

A REVOLUTIONARY NEW SLEEP SYSTEM

SlumberShield® has joined forces with HeiQ to create a revolutionary new sleep system. HeiQ Adaptive adds a powerful, dynamic polymer that reacts to your body to regulate your temperature while you sleep.

WHAT OUR CUSTOMERS SAY

"The SlumberCool® Protector has been of great benefit to me since I started using it! I tend to stay warm even on cool days, and evenings in the summer heat and late-summer humidity were a problem. It was all I could do to stay cool with windows open, a fan blowing, and on top of the sheets. My pillow and sheets would sometimes still be damp from the night's perspiration. I'd wake dehydrated and unhappy. The SlumberCool® Protector has allowed me more restful nights as the bed itself seems cooler, and I sleep more easily as my restlessness has greatly diminished. This is something I have and will continue to recommend to anyone with overheating problems." - Jason B.

"I finally found a solution to my night sweats, and am resting comfortably." -Christine R

SlumberCool®

Adaptive causes the fibers in a fabric to change shape in response to heat or cold, allowing for a perfect level of insulation and evaporation. This state-of-the-art, intelligent textile works all of the time, no "reactivation" required, to keep you unfailingly comfortable by constantly meeting the demands of your ever changing environment. Combined with the powerful protection of SlumberShield's® Breathe-A-Barrier®, you can sleep easy knowing your bed is protected and comfortable. Soothing comfort is matched with fierce protection of your valuable mattress investment, resulting in a drier, cleaner bed as well as a longer mattress life.

Available in Mattress Protectors and Mattress Encasements.

sleep easy.

MATTRESS PROTECTION

MATTRESS PROTECTION DESIGNED TO HELP YOU SLEEP EASY.

A comforting, luxurious Jacquard fabric is combined with breakthrough thermoregulation treatment resulting in an outstanding level of comfort and protection. ADAPTIVE treated textiles enhance the wearers comfort, complement the skin's natural moisture transport and control thermal cooling.

You've heard the claims of a cooler night's sleep before. Why is SlumberCool® different than the rest?

First and foremost, Adaptive always works. It requires no reactivation like older treatments. It is constantly active, dynamically responding to every change. In addition, SlumberCool's® unique construction increases air flow, moisture management, and evaporation to create a custom sleep environment. With the help of Adaptive's intelligent response, SlumberCool® becomes as insulating or breathable as you need it to be.

Older Phase Change Materials must be heated to the melting point to absorb heat energy as it moves from a solid state to a liquid state. This phase change produces a temporary cooling effect in the textile. It must then be reactivated by exposure to cold before becoming active again.

Comparatively, Adaptive's polymer is always active, immediately regulating any change in moisture level or heat. Instead of a single chemical reaction, Adaptive changes the way fabric responds to heat and moisture, insulating against cold, and becoming more evaporative and breathable in response to warmth. This dynamic response works to keep you consistently comfortable, resulting in a deeper, more restful sleep. Adaptive is so sensitive that it works on shared sleep spaces, creating a microclimate for each sleeper. Adaptive is the answer to the quest for a consistent, harmonious sleep environment. In addition, the added evaporative qualities raise the hygiene level of the bedding, and increase the lifespan of the mattress and pillows.

MATTRESS PROTECTOR FEATURES

- Heiq Adaptive Treated Fabric Transports Moisture and Heat Away From Your Body
- Breathable Waterproof Barrier
- Protects Against Stains and Liquid Damage
- Proven Dust Mite, Bacteria and Allergen Protection
- Easy Care, Machine Washable
- Responds Dynamically To Environmental Changes Creating A Cool, Dry Microclimate For Sleep

MATTRESS ENCASEMENTS FEATURE THE ABOVE & ARE ALSO:

- Certified, Laboratory Tested and Guaranteed Bed Bug Proof
